HARBOR MANUFACTURING 401(K) PLAN

555001

Important Information

- Based on the definition of Highly Compensated Employee (HCE), the employee(s) listed on the Future HCE Determination Report are considered highly compensated for the Plan Year beginning in 2026. The maximum average deferral rate for the Highly Compensated Employee(s) for the 2026 plan year is based on the average deferral rate for your Nonhighly Compensated Employees for 2026. Note: In addition, the actual amount the employee can defer in 2026 cannot exceed $24,500 or the annual addition limit (adjusted for "catch-up" contributions, if applicable).
- Your plan is designed to allow participants who were age 50 or older to make "catch-up" contributions. The 2025 limit was an amount up to $7,500. Please see the appropriate compliance test for any participants who took advantage of this provision during the plan year. For 2026, the "catch-up" contribution is an amount up to $8,000 for any participant who is or will be 50 or older at any time during the plan year. A plan may allow for higher catch-up contributions for participants age 60-63. For 2026, the catch-up limit for these participants is $11,250.
- If you sponsor a qualified retirement plan not administered by Mutual of America, please provide your service provider with a copy of this Valuation Report to complete the combined plan testing. Upon request, we can perform the combined plan testing. Please contact your local regional office representative to discuss.
- The plan's employer match contribution is calculated on a participant's compensation earned for each payroll period. We recommend reviewing your payroll records to determine if the plan's match formula was applied correctly to each payroll period. We also recommend reviewing your match contributions to ensure that employees did not receive a match contribution in excess of the contribution limit based on the annual compensation limit. Work with your local regional office representative if adjustments to the employer match contribution are required.

Compliance Reports

NONDISCRIMINATION IN AMOUNTS TESTS (ADP/ACP)

The Average Deferral Percentage (ADP) test determines if there is discrimination between the salary deferral contributions of the Highly Compensated Employees and the Nonhighly Compensated Employees. The Actual Contribution Percentage (ACP) test determines if there is discrimination when employer matching contributions and/or employee voluntary after-tax contributions are made for both the Highly and the Nonhighly Compensated employees.

EXCESS DEFERRAL CONTRIBUTIONS

The Code Section 402(g) maximum employee deferral contribution for the 2025 calendar year was $23,500. This limit is $24,500 for the 2026 calendar year. Please monitor employee deferrals during the payroll process to make sure that no participant exceeds this limit. Any excess deferred contribution plus credited investment earnings must be refunded by the April 15th following the calendar year in which the excess occurred. Failure to do so could adversely affect the tax status of your plan. If an employee has participated in your plan and the 401(k) plan of an unrelated employer during the calendar year, then the employee is responsible for notifying one of the plans of any 402(g) excess before March 1st following the calendar year in which the excess occurred.

If your plan is designed to allow for catch-up contributions, they are not taken into account for this limitation. The catch-up contribution for 2025 was $7,500. The catch-up contribution is $8,000 for 2026. Any participant who turns 50 or is over 50 years of age during the plan year can take advantage of this provision.

A plan may allow for higher catch-up contributions for participants age 60-63. For 2026, the catch-up limit for these participants is $11,250.

ANNUAL ADDITION LIMITATION (415 CONTRIBUTION LIMIT)

The Annual Addition Limitation is the lesser of $72,000 or 100% of Section 415 Compensation. The employee and employer contributions and any forfeitures to be reallocated to a participant for a plan year ending 2026 cannot exceed the lesser of $72,000 or 100% of Section 415 Compensation. Section 415 Compensation is defined as total compensation earned. Section 401(k) salary deferrals, flexible spending account contributions and pre-tax insurance premiums are not deducted from the participant's compensation to perform this test. If you sponsor more than one qualified defined contribution plan, the combined contributions from all plans must be considered when testing the Annual Addition Limitation for each participant. All plans sponsored by you or administered by Mutual of America are included in the testing. (If your plan is designed to allow for catch-up contributions, they are not taken into account for this limitation.)

COMPENSATION LIMITATION

For purposes of allocating contributions and forfeitures and for discrimination testing, the Internal Revenue Service has issued compensation limits. For plan years beginning in 2025 the compensation limit per participant is $350,000. This limit is $360,000 for the 2026 plan year.

TOP HEAVY TEST

The top heavy test compares the plan assets of all qualified plans sponsored by the employer that benefit the key employees to the total plan assets of the same plans. Generally, a plan is top heavy when more than 60% of the plan's assets benefit the key employees. If your plan is top heavy, you may be required to make a minimum contribution for all eligible non-key employees who were employed on the last day of the plan year. Also, if your plan is top heavy you will be required to use the top heavy vesting schedule selected in your plan adoption agreement.

410(b) COVERAGE TEST

A retirement plan, as a condition of qualification must satisfy coverage rules. The plan in general must benefit at least 70% of the includible Nonhighly Compensated Employees. Each contribution source (employee deferrals, employer match, and employer discretionary, money purchase contribution) must be tested separately. Corrections are required for each source that does not pass the 70% benefit test.

COMPENSATION TESTING (414(s))

A plan that utilizes a definition of compensation that does not automatically satisfy IRC Section 414(s) is required to test the compensation definition to show that it does not discriminate in favor of the highly compensated employees. Plans with Highly Compensated Employees that exclude bonuses, overtime, and/or commissions from their definition of compensation are required to pass this test. Additional exclusions can also result in the need to perform this test.

BENEFITS, RIGHTS AND FEATURE TESTING (401(a)(4))

Plans that provide benefits or features of different levels or types, for different groups of employees are required to show that each Benefit, Right and Feature (BRF) is available to all employees on a nondiscriminatory basis. Each BRF must satisfy two nondiscrimination requirements. The first requirement is the Current Availability Test and the Nondiscriminatory Classification Test. These tests pass if they do not favor the Highly Compensated Employees. The second requirement is for Effective Availability. This is an anti-abuse provision that requires that the group of employees to whom a BRF is effectively available must not substantially favor Highly Compensated Employees. If your plan requires this type of testing, additional information will be provided.

Administrative Reports

HCE/KEY EMPLOYEE DETERMINATIONS

This report lists the employees, if any, classified as Highly Compensated Employees (HCE) or Key for this plan year and the prior year.

EMPLOYEE CENSUS REPORT

This report lists all employees, including those terminated with account balances as of the last day of the plan year, reported to Mutual of America. The report includes date of birth, date of hire, date of entry, compensation, hours worked and plan status for each employee listed.

CONTRIBUTION ANALYSIS

A summary of total contributions allocated to each employee by contribution source for the plan year. The report includes all deposits received and any receivable contributions for the plan year. Forfeitures to be reallocated for the plan year are shown for each employee entitled to the allocation. Forfeitures used to reduce contributions are not reflected on this report.
